

User manual for QR Code label

All our IPC or NVR will have 2 labels, label 1 is general info for IPC or NVR, like model, system, lens etc. Label 2 is QR code label for remote view on mobile , IE or CMS.

All our IPC or NVR have Cloud P2P service, it has an unique Serial ID for user to log in their device anytime, anywhere. Don't need do port forwarding. Buyer can find serial ID in the CMS software(VERSION), and after connect their device with internet(Nat status-CONNECTED). They can remote view via Serial ID on Mobile, IE or CMS.

For convenient reason, We make a QR code label with Serial ID and website, and put on IPC or NVR body. Thus buyer don't need log in CMS software to get ID every time. Our QR code label includes 1x QR code and 1x ID and 1x website. If you scan the QR code, you will find that content inside is the ID and website.

Please see details as below;

The image shows a screenshot of the 'Device Config' software interface on the left and a photograph of the camera's QR code label on the right. The software interface displays the following information:

Setting -> Info -> Version	
Record Channel	8
Extra Channel	0

Android App

Choose Login by device and copy Serial ID below QR code to login

3, If you want to remote view in CMS software, You just Choose CLOUD when add the device, and then Copy ID from label and add the device.

The screenshot shows the 'Edit' window of the CMS software. At the top, there is a table with the following columns: NO., IP Address, Port, MAC, and Vendor. Below the table, there are three buttons: IP Search, Add Device, and EditDevice. The 'Add Device' section contains the following fields and options:

- Device Name: Test
- LoginType: IP Address, Domain, ARSP, Cloud
- Serial ID: Copy Serial ID below QR code
- User Name: admin, Password: [empty]
- Zone: 1
- Vendor: H264DVR

At the bottom, there are two buttons: OK and Cancel. A red circle highlights the 'Cloud' checkbox, and a red arrow points from it to the text 'Choose cloud'.
